# Introduction

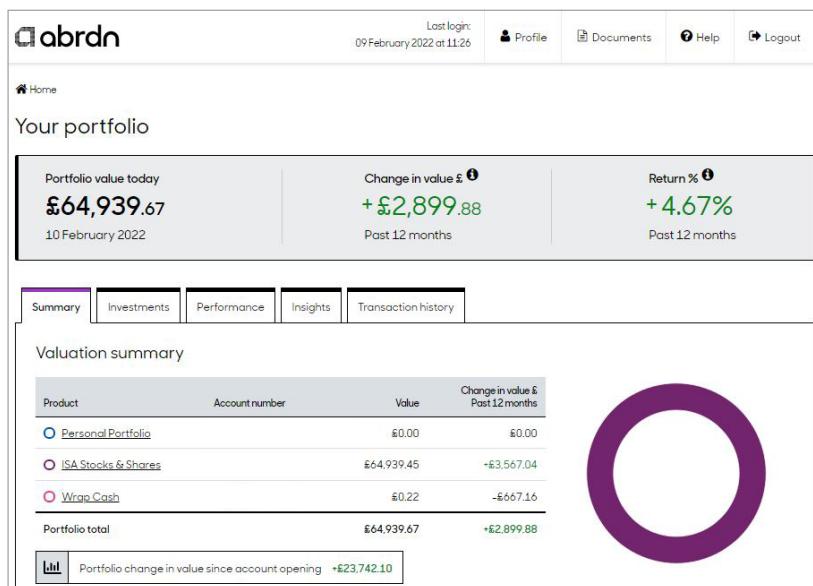

Welcome to client portal, our online dashboard for your selected clients. This guide will take you through how clients will register and login for the first time, using our security partner Okta. Security is incredibly important to us and Okta are a market leader in access management.

Once registered, clients will have access to the information needed to keep track of their account.

## Client portal allows your clients to:

- see a quick summary view of their portfolio
- view up-to-date valuations, product details and documents
- access on their desktop, tablet or mobile
- reset the password and unlock account if needed

In addition, your firm has the option to add a brand logo, choose the level of access, and the investment view which is the most relevant to your clients.

The screenshot shows the abrdn client portal dashboard. At the top, there is a navigation bar with links for 'Profile', 'Documents', 'Help', and 'Logout'. Below the navigation bar, the 'Home' link is highlighted. The main content area is titled 'Your portfolio'. It displays the following information:

- Portfolio value today:** £64,939.67 (10 February 2022)
- Change in value:** +£2,899.88 (Past 12 months)
- Return %:** +4.67% (Past 12 months)

Below this, there is a navigation bar with tabs: 'Summary' (which is selected), 'Investments', 'Performance', 'Insights', and 'Transaction history'. The 'Summary' tab is currently active, showing a 'Valuation summary' table:

Product	Account number	Value	Change in value £ Past 12 months
Personal Portfolio		£0.00	£0.00
ISA Stocks & Shares		£64,939.45	+£3,567.04
Wrgn.Cash		£0.22	-£0.16
<b>Portfolio total</b>		<b>£64,939.67</b>	<b>+£2,899.88</b>

At the bottom of the summary table, there is a note: 'Portfolio change in value since account opening +£23,742.10'.

**"Clients will have access to all the information needed to keep track of their account"**

This example is for illustrative purposes only. No assumptions regarding future performance should be made.

The value of your clients' investment can go down as well as up, and may be worth less than was originally invested.

# Configuration

## How do I set up the client portal for my firm?

Any Admin user in your firm can configure access for your clients. This can be done on **Dynamic Menu > Users and access > Firm configuration > Configure my client portal**

There is a simple step-by-step process which can be edited anytime. You can:

- Add firm logo (optional)
- Add firm contact details (optional)
- Set return calculation (simple or IRR)
- Set asset view (tier 1, tier 2 or no asset class)

**Welcome to the client portal set-up**

This allows you to tailor the portal to your clients' needs.

[Back to wrap](#) [configure now >](#)

## Providing client access

Ensure client portal access is set to Yes either at new business set up or, on an active account go to **Roles > View account information**.

### Add new user

For an Individual Account go to Activity and Create User and save.

For a Joint Account search for the client you want to set up a profile for which can then be done via Activity and Create User.

Once saved this will automatically issue the welcome e-mail to the client prompting them to register with Okta.

### Adding additional accounts to an existing profile

Search for the account you wish them to have access to. Go to **Roles > Add interested party**. Tick the box next to the account holder name and then select Account access as the role. Select Existing and then enter the name of the user and click + add client. Ensure the details are correct and read only access is set to Yes and Submit.

### Adding a new Interested Party for Access

Go to Roles and when adding an Interested Party select New which will prompt you to enter client details for this profile, you can then search for this client and within Activity you will be able to create the user profile by simply adding in the e-mail address and clicking save.

### Removing accounts from an existing profile

On the Roles tab for the account that is to be removed from the users profile you can remove the access for the Interested Party within this section by clicking the remove icon.

### Access oversight

You now have oversight of who has access to view accounts. To see who has access to view an account go to Roles where you can see the Interested Parties who have Online access. You have the ability to edit or remove the Interested Parties here.

# Choosing access levels

## What different access levels are available?

### Client Basic

Valuation summary and documents.

### Client Standard

Valuation summary, documents, investments (including insights) and performance.

### Client Advanced

Valuation summary, documents, investments (including insights), performance and transaction history.

Access is set on individual client basis, giving you flexibility to offer the right level of information to your client.

---

# Account permissions

## Consolidated accounts

A consolidated account view is not currently available on the client portal. However, having reassessed this position with our Legal and Data Protection teams, we are planning to develop a consolidated view for the client portal. We will provide a timescale for this development once confirmed.

Adviser firms can continue to consolidate individual accounts on the platform for their own reporting purposes.

# Registering for client portal

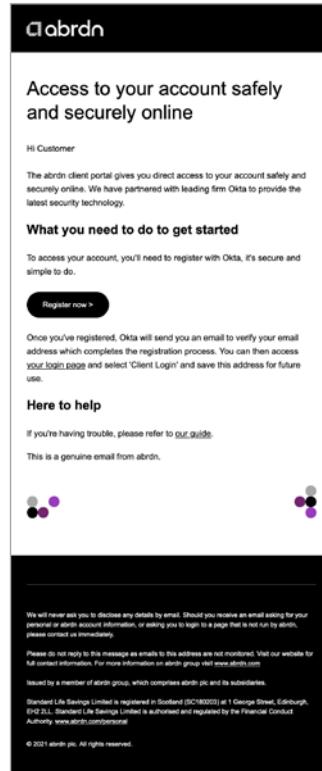

## Welcome registration email

We'll send your clients an automated welcome email explaining how to get started.

Registration with Okta is required to access the client portal. There is a link on the email taking clients directly to the page on the Okta website to complete the registration process.

Please note, the registration link is only available for 72 hours after the email is sent. If a client tries to register beyond the time limit, there is an option to have the email re-sent.

# Registration

## How do my clients register?

After clicking on the 'Register with Okta' link from the Welcome Email there is a registration step.

The email address will pre-populate from the one we have registered for the client on the platform.

Please note, this has to match the platform for security reasons. Email addresses can be changed later if required.

The password must be at least 12 characters – there are no specific character restrictions but there are checks in place to ensure the password is strong.

There is no expiry date on passwords and they can be changed at any time. Page 13 of this guide explains how to do this.

# Email addresses

## Are there any restrictions on email addresses?

Our security authentication procedures ensures we maintain the latest safeguards.

A key requirement for this is a unique email address for each client so that we have a one-to-one match between email account and client for identification.

## What happens if clients share an email address?

Our main objective is to strengthen client security of their information. This means we must have a unique email address for every client so that a one-to-one match between email account and client can be established.

It's worth noting that users can unlock accounts via self-service which is all done by email. This is why we need it to match.

# Logging in

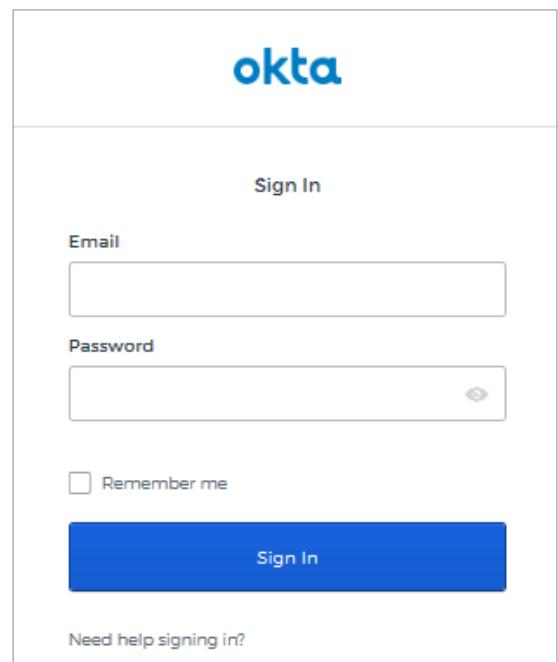

## How do my clients login?

Once registered, your client will receive a verification email to activate their account. As soon as this is activated they will be taken directly to the client portal.

After the verification is complete, your client can log in again in future by visiting your firm's bespoke login screen and entering their email address and password.

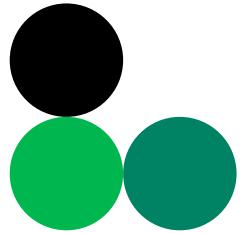

There is a link to get help on this screen if a client has forgotten their password.

There is also a facility to unlock the account if there has been more than five unsuccessful password attempts. An email will be sent giving guidance on the steps to follow.

The image shows a screenshot of an Okta sign-in page. The page has a light blue header with the 'okta' logo. Below the header, the word 'Sign In' is centered. The main area contains two input fields: 'Email' and 'Password', both with placeholder text. Below the password field is a 'Remember me' checkbox. At the bottom is a large blue 'Sign In' button. Below the button, a link 'Need help signing in?' is visible.

# Summary

## What will the client see first?

The first screen is a summary view of the portfolio. This shows today's total portfolio valuation, the change in value (monetary and percentage) over a 12 month period, or from account opening if less than 12 months' data exists, and a breakdown of the products held.

The return % has been calculated using the Simple Return basis.

### Valuation history

This shows the valuation of your portfolio tracked from 31 March 2017 to 10 February 2022.

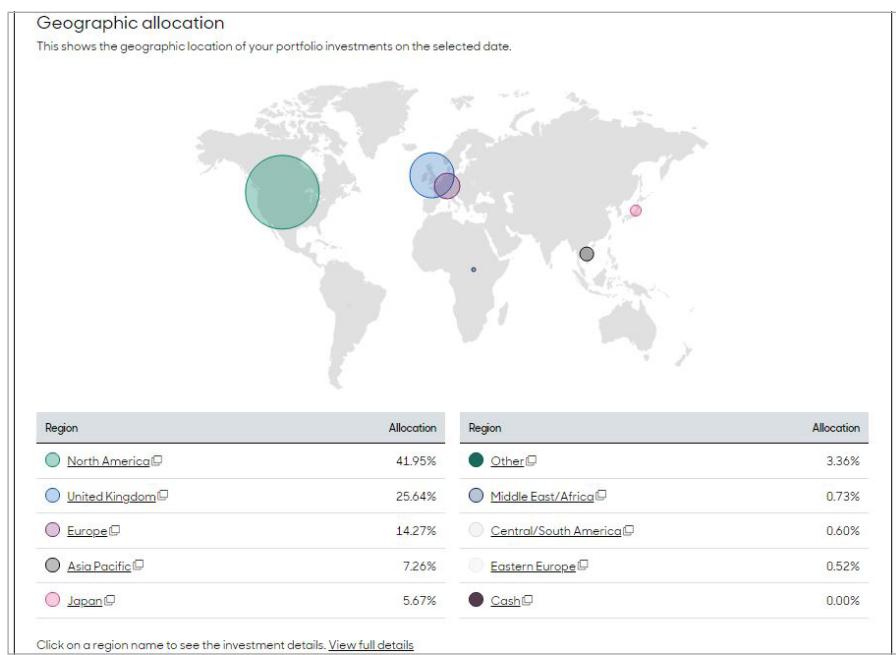

Remember the value of investments, and any income from them, can go down as well as up and you may get back less than you invest. Past performance is not a reliable indicator of future results.

This example is for illustrative purposes only. No assumptions regarding future performance should be made.

# Investment insights

This page shows the geographic, asset and sector allocations of the investments held at a point in time. The date can be backdated.

This example is for illustrative purposes only. No assumptions regarding future performance should be made.

# Transaction history

Available only at Client Advanced access level.

This page lists cash and investment transactions over a set period of time.  
The time periods can be backdated.

This example is for illustrative purposes only. No assumptions regarding future performance should be made.

# Documents

## Can my clients see documents on the client portal?

There is a document library which will store all copies of the uploaded documents on the account. Clients can also access a literature library from this page with links to suitable forms and guides.

This will be available to all clients regardless of level of access.

The screenshot shows the 'Documents' section of the abrdn client portal. At the top, there is a navigation bar with the abrdn logo, a 'Profile' link, a 'Documents' link (which is highlighted in blue), a 'Help' link, and a 'Logout' link. The date 'Last login: 09 February 2022 at 11:26' is also displayed. Below the navigation bar, the page title 'Your documents' is shown. To the right of the title is a 'Literature & guides' section with a link to 'View the latest terms & conditions, key features and guides here.' Below the title, there are two dropdown menus: 'Document type' (set to 'Select document types to view') and 'Date' (set to 'Past year' with a range from 'From 11 February 2021 until 10 February 2022'). The main content area displays a table of documents. The table has columns for 'Date', 'Type', 'Document', and 'Download'. The data in the table is as follows:

Date	Type	Document	Download
10/02/2022	Document	Cost and Charges Disclosure	
15/11/2021	Orders and trades	Contract Note Consolidated	
26/09/2021	Reports	SL Annual Statement	
15/09/2021	Orders and trades	Contract Note Consolidated	
14/07/2021	Orders and trades	Contract Note Consolidated	
20/06/2021	Reports	SL Annual Statement	

## Security details

### How do clients update their password after initial Okta registration is complete?

In the Profile area there is an option to update security details.

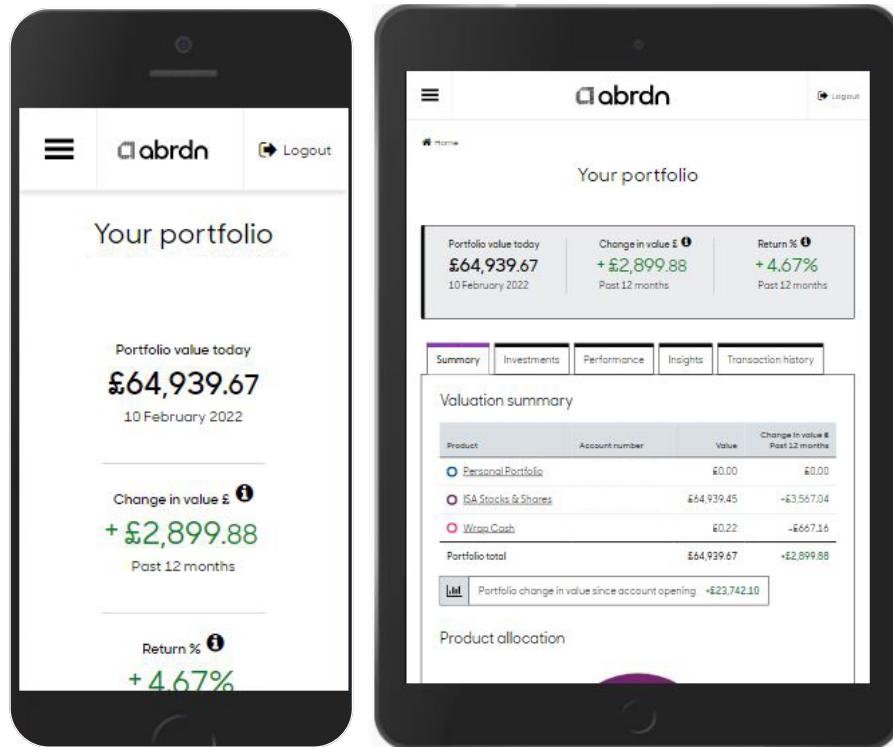

The screenshot shows the 'Profile' section of the abrdn client portal. At the top, there is a navigation bar with the abrdn logo, a 'Profile' link (which is highlighted in blue), a 'Documents' link, a 'Help' link, and a 'Logout' link. The date 'Last login: 09 February 2022 at 11:26' is also displayed. Below the navigation bar, the page title 'Your profile' is shown. There are three tabs at the top: 'Personal details', 'Account details', and 'Security details'. The 'Security details' tab is currently selected. Below the tabs, the section title 'Security details' is displayed, followed by the text 'You can change your password online through our secure services with Okta.' To the right of the text is a lock icon. At the bottom of the section is a 'Change password' button.

# Mobile view

## Can clients view client portal on their mobile devices?

Client portal is fully mobile responsive. The client can login using the internet browser on any device.

Client portal's responsive design means the display automatically adjusts the sizing, layout, and proportions to the mobile device so it is easy to view and intuitive for the user.

This example is for illustrative purposes only. No assumptions regarding future performance should be made.

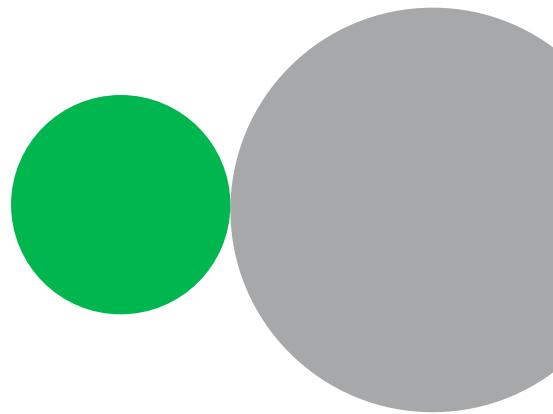

## Compatible browsers

The platform will work best on latest versions of modern browsers e.g. Edge, Chrome, Safari, Firefox. With these browsers, latest version covers the most recent stable version and the one before that. If you use an older browser, your user experience may not be optimal.

## Can clients add client portal to their mobile device home screen?

Yes, devices have the option to save the Welcome/Client Login page URL as an icon to provide quick access to the mobile site.

The client will be responsible for entering a username and password. It's the device that makes this login easy and allows username/password to be saved on the device and then re-used when the client portal requests it. These are normally validated by using the security on the device (e.g. face ID or touch ID).

## Further support

If you have any questions, please speak to your usual contact or call the Client Engagement Hub on
